Mental health update for Pharmacists: Masterclass

A free, one-day, masterclass for community pharmacists.

The programme aims to provide added value by targeting and supporting the community pharmacy group within the primary care workforce. This training is open to Pharmacists in London, Surrey, Sussex, and Kent and funded by Health Education England

Learning Objectives:

- Refreshed knowledge on a range of mental health disorders including anxiety, depression, OCD, PTSD, ADHD, bipolar affective disorder and schizophrenia.
- Enhanced knowledge of personality disorders and how these interact with the mental health disorders above.
- Increased knowledge about the latest range of evidence-based pharmacological and psychological therapies used to treat and manage common disorders.
- Increased confidence in being able to help patients navigate pathways between primary care, IAPT, acute trusts, and secondary mental healthcare services.
